

Change Notice No.	Notification date	Implementation date
CN/16/09	30 th July 2016	30 th August 2016

Subject : Rationalization of product catalog number of **mdi** Stericheck SVP Dilutor

Scope : This change notification will affect the pack size code of the products with following catalog numbers:

- SVPDXXXXXXXXX202
- SVPDXXXXXXXXX302

Background:

In our efforts to rationalize the number of devices per pack and its catalog number, certain changes have been done in the product catalog number of the **mdi** Stericheck SVP Dilutor with catalog numbers as mentioned above.

Need for Change:

mdi Stericheck SVP Dilutors having pack of 20 devices are supplied with above catalog numbers (last two digits as pack size code 02). The pack size code '02' has been assigned to a pack of 10 numbers for other products. To maintain the uniformity of pack size code for all product types, the product catalog number of **mdi** Stericheck SVP Dilutor has been rationalized.

How Does It Affect the User:

From a practical point of view, this change only affects the product catalog number of the Stericheck SVP Dilutor. All performance specifications, product attributes, and traceability will remain unchanged. All packaging attributes such as packaging box, number of devices in a box and labeling will remain same as before, only the last two digits (pack size code) of product catalog number are changed.

The existing pack size code in product catalog number (last two digits i.e. 02) of **mdi** Stericheck SVP Dilutor has been rationalized. All product catalog numbers mentioned above will now end in 09 instead of 02. The **mdi** Stericheck SVP Dilutor manufactured after the implementation date as mentioned above will have the said changes.
