Subject : New packaging box for mdi Capsule Filters

Scope

: This change notification will affect the products with following catalog numbers:

- (* can be any alphabet or numeral):
- D***52*******
- D***53******
- D***57*******

Background:

In our efforts to provide the user products with better and robust packaging, certain changes have been made in packaging box of **mdi** Capsule Filters with catalog numbers as mentioned above.

Need for Change:

During review of packaging of the capsule filters with catalog numbers as mentioned above, the need to strengthen the packaging box as well as to redefine the dimensions of the packaging box was observed. The existing packaging box of capsule filters may get damaged during extreme conditions of transportation and handling. To address these observations, the packaging box of **mdi** Capsule Filters has been improved by providing more strength to the packaging box and marginal increase in the packaging box dimensions. Further, the aesthetics have been improved with inclusion of handling signs and removal of product pictures. The new packaging box was validated to withstand extreme conditions of transportation and handling. No change has been done in product attributes and product specifications.

How Does It Affect the User:

This change is related to the packaging box and only the box strength and dimensions will be redefined. All performance specifications including printing ink and method of printing of packaging box remain unchanged.
