**Subject:** **Addition of volume in Certificate of Quality (COQ) for MDI AseptiBags and AseptiLiners**

**Scope:** **This change notification will affect the products with following catalog numbers (# can be any alphabet or numeral):**

- ABD#####
- AL#####

**Background:**

To provide more clarity in the product identification on the COQ, a change has been done in Certificate of Quality of MDI AseptiBags and AseptiLiners with catalog numbers as mentioned above.

**Need for Change:**

Existing Certificate of Quality of MDI AseptiBags and AseptiLiners includes the product details such as Catalog number, Lot number and Sterilization cycle number etc., but the capacity of the bag is not mentioned in the COQ. Although the capacity (volume) of the bag is uniquely identifiable from the catalog number but to make it clearly evident on a quick glance, the volume of the bag has been incorporated in the certificate of quality of MDI AseptiBags and AseptiLiners with catalog numbers as mentioned above by including a 'Volume' field in the title header.

**How Does It Affect the User:**

From a practical point of view, this change only affects the certificate of quality of MDI AseptiBags and AseptiLiners. All performance specifications, product attributes, traceability and lot release criteria will remain unchanged. All packaging and labeling attributes such as packaging box, pack size and content of the product package label remain same as before, only additional information in the form of 'Volume' in the title header has been incorporated.

**Implementation of Change:**

MDI AseptiBags and AseptiLiners with catalog numbers as mentioned above, manufactured after the implementation date **(5<sup>th</sup> January, 2020)** will have the said changes. However, the available stock of MDI AseptiBags and AseptiLiners having certificate of quality without Volume mentioned in the title header will be received by you till the stock's last.
