

Change Notice No.	Notification date	Implementation date
CN/A/24/006	December 28, 2024	January 06, 2025

Subject : Rationalization of placement of Certificate of Quality (CoQ) of mdi Single Use Assemblies in shipping boxes.

Scope : This change will affect all the Single Use Assemblies without filters.

Background

In existing system, the CoQ of Single Use Assemblies without filter are packed in each box containing assemblies. However, in case of assemblies with sterilizing grade filter, the envelope containing all the CoQs for the assembly lot along with the envelope containing all the CoQs of sterilizing grade filter used in that lot are placed in one of the shipping boxes with label "Certificate of Quality Inside" pasted on two sides of the box.

Need for Change

In order to rationalize the placement of CoQs for both mdi Single use Assemblies (with and without filter), the same shall be packed in one of the shipping boxes with label "**Certificate of Quality Inside**" pasted on two sides of the box.

How Does It Affect the User

From the user point of view, the changes done will have no impact on the quality of the product (as the change is done only for the rationalization for packaging of CoQ of Single Use Assemblies).

Implementation of Change

mdi Single Use Assemblies released by QA after the implementation date will have the said changes in the packaging of Certificate of Quality for the product.
