

**Reference: CHANGE NOTICE No. CR/13/04**

**Subject : Modification in identification on Cartridge Filter (Sizes greater than or equal to 10”)**

**Scope : This change notification will affect the following products:**

- **mdi** Polyethersulfone Membrane Cartridge filter types CPPKS, CPPMS, CPPKR, CPPMR, CPHS, CPHSR (all pore sizes)
- **mdi** PTFE Membrane Cartridge filter types CPTF, CETF, CPTH (all pore sizes)
- **mdi** Nylon Membrane Cartridge filter types CPNN, CPNS, CPNP, CPNNZ, CPNSZ (all pore sizes).

**Background:**

In our efforts to provide the user better products with better identification and traceability, certain changes have been made in the identification on **mdi** cartridge filter of size greater than or equal to 10” for types mentioned above.

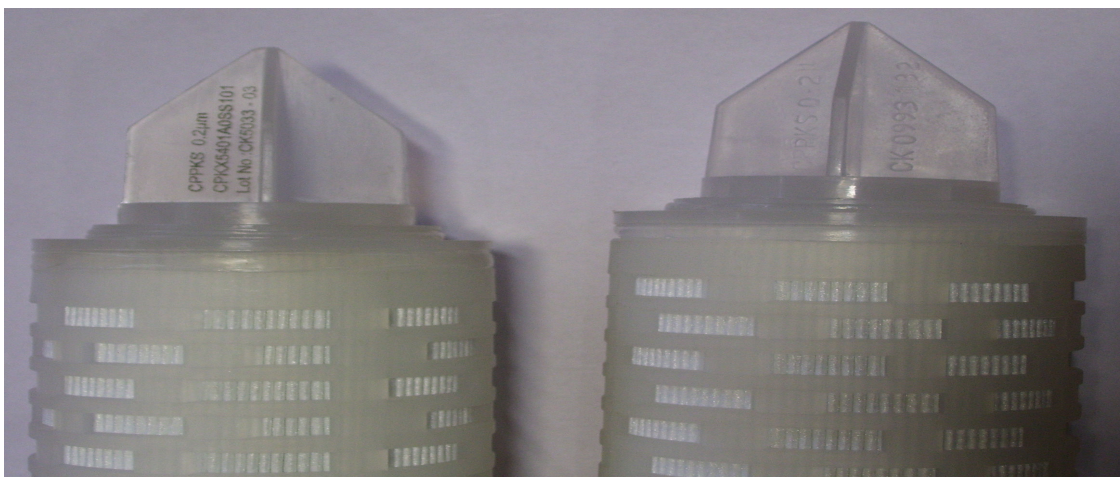

**Need for Change:**

To improve the identification and traceability of cartridge filters under different conditions of use.

**How Does It Affect the User:**

From a user point of view the changes done will improve the identification, traceability and ease-of-use under actual conditions of use. All performance specifications, product attributes and main content of the identification remain the same.

- **Identification on cartridge filter** – Laser etching method is now used to print the identification details on cartridge filter which was earlier done by embossing on the cartridge filter. Product catalog number is now printed along with product type, pore size, Lot No. and serial No. This will improve the identification of the filter with regards to easy to read.

**Effective Date:**

**mdi** Cartridge Filters (types mentioned above) of size greater than or equal to 10" manufactured after October 1, 2013 will be with said changes.
